LONDON. - Under supervision by American women, canteens are to be established at all toe leading railway stations in London, where sandwiches coffee and other light refreshments will be supplied tree to soldiers in

Thousands of soldiers pass through London daily, frequently without suffi-

cient money to buy food. In work at railway stations the American women who have been looking after stranded Americans and Belgian refugees, have learned of the great need for canteens where the soldiers can be promptly provided with nourishing food without cost. The War Office is so well impressed with the women's plan that its assistance in carrying on the work has been as-

Mrs. Viola Scott. Mrs. A. T. Stewart and a score of other American women who have been assistiving travelers ever since the opening of the war are the prime movers in the plan and have the backing of the entire American Women's War Relief Committee.

Mrs. Benjamin Lathrop, who is one of the most activ- workers in the French Emergency Committee, organ-ized to supply the immediate needs of hospitals in the north of France, has interested Mrs. H. C. Hoover and many other American women in this particular movement and is collecting generous quantities of ether and other hospital supplies so sadly needed in many of the isolated hospitals near the battle line. Mrs. Lathrop left London this week for an inspection tour in Northern France.

The Duchess of Marlborough has accepted the chairmanship of the phil-anthropic committee of the Society of American Women in London, This already has a number of workrooms established for the employment of wo-men thrown out of work by the war. Mrs. A. T. Stewart, with the assistance of this committee, has just opened a workroom at 123 Victoria street, where indigent gentlewomen will be afforded an opportunity to earn a liv-ing. At present 50 women are afford-ed employment there, most of them knitting supplies required by the army.

WOMEN AND BUSINESS

We are given to boasting of the abil-y of our business women, of their aving proved themselves the equal having proved themselves the equal of the men in business affairs. Our boast seems to be justified. But the business ability of the average woman is not such as to warrant it being commended unsparingly. Nearly every woman has had a little business experience in some direction, but how many woman readers of this periodical, or friends of such readers, are possessed of sufficient business knowledge to take up the responsibility, when laid down by the husband, and carry it on? How many women could take charge of their husbands' finances for a week while he took a much needed vacation from responsibility?

Most married men are willing to teach their wives how to do business;

ers. It will be easier for the widowed additional fats that thin people need and fatherless to handle and to husband their funds. There may be less While this new preparation has givusiness for the lawyers and for the isiness for the lawyers and for the en splendid results as a nerve-tonic ankruptcy courts and less money for and vitalizer, it should not be used by the promoters of questionable stockng enterprises, but there will be happiness in the homes.—Editorial in Woman's World.

To overcome a financial shortage due in the Transvaal and the Union of South Africa, gold companies there will be subject to a special tax on

tion to a little work that I have here."

"Yes?" replied the editor. "Well, let me call your attention to a whole lot of work that I have here."—Youths' claim to a which looks like."

ribbon in butterfly bows around the crown, in which are caught clusters of small flowers. The second hat is a roll- in a single casting, readily removed by

WHAT THE VOICE TELES.

That the pitch of the voice bears is expressed in the face. For the same reason we would expect to find wrongs of life expressed in the voice, in all animals using the voice and es-pectally in man who finds it the princinal instrument of expression.

As we come into the sick-room, we inconsciously give attention to the voice of the sick person quite as much find that it expresses strength or cal conditions and also shadows forth the condition of the brain in its tone, which varies from the listlessness of extreme weakness to the querulousness of excited feebleness and excitation of overactivity.-Woman's World for March.

THE COLONIAL HOUSE.

Even to people of little or no building experience the economy of a home built, "like a box" is quite apparent.

To many designers the Colonial type appeals immediately as one of the the embellishments of which cost little, no expensive ornate "gew-gaws" being required. In the successful Co-lonial design second-story windows are usually placed directly over those below. Then there are little refinements of cornice, little embellishments of lattice work, little touches such as small lights or glass in the windows-little points that add grace here and there—so that our box be-comes a pleasing architectural design. -Woman's World for March.

question whether our critic or any other man is able to draw the fine line that separates the ornamental from the purely useful, either in woman's dress or in his own. May there not be some

of the peacock in us all? But if a woman is thinking only of attracting attention to herself the demure little Quakeress has the best of us all in this riot of change and of color. Why not place some of the blame for the fast and furious changes in woman's dress upon the manufacturers of feminine garments, who find it exceedingly profitable to turn out new styles with every change of season?

NEW SANITARY DEVICE.

ONE of the most acceptable of the latest inventions for the home is a sanitary underground garbage receiver in which the garbage can be cremated if one so desires. Its price is within the reach of almost every householder, and it solves the garbage can problem in every particular.

Its simplicity is at once its attraction and its value. Buried underground (with only its hood in view) at a convenient distance from the kitchen door, it is not only accessible, but sealed CHILDREN'S hats of natural colored the throwing off of odors. The inner chip straw. One hat consists of a can is inclosed in an outer one of sixround crown, with a narrow, drooping ten gauge American ingot fron that brim, the edge finished with shirred will not rust in the ground, and the brown ribbon, with a trimming of the combination of the two cans renders it

the collector. It is fitted with an au-trimming of also marie ribbon and that constite hopper that closes when not in railow flower bilds.

WHAT THE FASHIONS SHOW.

It has been said that while Paris some relation to certain states of feel- held sway as fashion dictator, the deing is tolerably clear. Wrongs of life signers borrowed ancient styles and usually are revealed through the habit- remodeled them according to modern ual channels of expression; where the lines Now that our American cities habit of flowing in health, they in styles, the old-fashioned models are cline to flow in disease. Mankind uses borrowed outright without change. A the facial muscles to express its feel- striking example of this has just been ings or sensations, and hence disease exhibited in one of the shop windows. dimity. The waist, close fitting, low at the collar, has long, snug sleeves; the front is embroidered with a spray of white flowers beneath which two tucks run around to the back. The girdle is a straight piece of rich, green ribbon hung from a high waistline. The skirt, plaited on to the waist, has for its only trimming four graduated tucks beginning with one, two and one-half inches wide, just below the hips, and ending in a four-inch hem which stops short at the ankle.-Woman's World for March.

THE GOVERNMENT'S HEARTY

Already we have what is known as gricultural extension work in our colleges, but few of them, save Cornell, have done much to help the woman of the rural districts. But now Physician's Advice for Thin, Undevel- the federal government itself and the several state governments are coming Thousands of people suffer from excessive thinness, weak nerves and fee-ble stomachs who, having tried adver-Most married men are willing to sach their wives how to do business; present than that, most business men ake something of an effort to get their wives to undertake to learn lough business to make it less difficult for them to get along when left tone. Where, then, is the fauit? Then it is not the business man's filure to insist on his wife learning, is the wife's unwillingness to take.

Thousands of people suffer from exform excessive thianess, weak nerves and fees ble stomachs who, having tried advertised flesh-makers, food-fats, physical culture stunts and rub-on creams, resign themselves to life-long skinniness and think nothing will make them fat. Yet their case is not hopeless. A recently discovered regenerative force makes fat grow after years of thin to help her to such rest periods as when it is not the business man's failure to insist on his wife learning, it is the wife's unwillingness to take time, to make the effort.

Here is a subject for study and discussion by women's clube—for all sorts of feminine organizations. If the women of a community can be made into better business women they will understand better how to help their husbands to develop their own and the community business. They will learn the value of the dollar, and they will appreciate the labor involved in securing it. They will develop an interest in getting their monoy's worth which they have not before felt.

cently discovered regenerative force makes fat grow after years of thinness, and is also unequalled for repairing the waste of sickness or faulty digestion and for atrengthening the involved digestion and for atrengthening the master of sickness or faulty digestion and encouragement to perform her daily duties, so that they shall not be irksome and unwholescally digestion and seather involved in this peeriess preparation, which is endorsed by eminent physicians, and used by prominent people everywhere.
